COMMODITY TRADE BY INDUSTRIAL SECTOR

Historical Summary 1983-1987

Attached is a statistical review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1983-1987. The tabulations show total exports (including re-exports), total imports, and re-exports on a customs value basis. For exports and imports separate breakdowns are provided for five major trading partners: United States, Japan, United Kingdom, European Economic Community (EEC) and the Organization for Economic Cooperation and Development (OECD).

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups (1980 SIC), i.e. exports to the industries which have produced or manufactured these commodities in Canada, and imports to those industries which could or would produce or manufacture these commodities in Canada.

It should be emphasized that, although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the merchandise trade balance. The latter measure is more appropriately calculated using trade data adjusted on a balance of payments basis.

This report, produced from Statistics Canada's latest records, updates the previous "Commodity Trade by Industrial Sector, Historical Summary, 1982-1986" issued by the Statistical Analysis Division, Department of Regional Industrial Expansion, in 1987.

For the 1988 update presented here, a historical summary is provided only for the most recent 5-year period (1983-1987). Any users requiring a longer time series are referred to the 1986 edition, which provided data back to 1966 on a 1980 SIC basis.

The 1987 data presented here will be the last year for statistics based on the Canadian International Trade Classifications (CITC). Commencing in January 1988 Canada adopted the new Harmonized System for Commodity Trade Classifications. It is our intention to continue producing this report, although some compatibility problems may arise between data based on the old and new classifications.
